### Recommended Geometry of Solder Pads

A = 0,5 mm  
 B = 0,7 mm  
 C = 1,2 mm  
 E = 0,76 mm

### Recommended Soldering Temperature Profiles

This component is only suited for IR-soldering at relatively low temperatures and must not be wave soldered because of dissolution of the metallization!

Max. reflow temperature: 235° C, 30 sec  
 220° C, 45 sec.  
 Max. reflow cycles: 2 x .

As far as possible, the components shall be employed within 6 months. They should be left in their original packings to avoid soldering problems due to oxidized contacts.

Storage temperature: -25 to 45°C

Relative humidity: <75% annual average, <95% on max. 30 days in a year.

The usage of mild, non activated fluxes for soldering is recommended, as well as a proper cleaning of the PCB.
