

OUTLINE

The R5510Hxxxx Series are CMOS-based voltage regulator (VR) ICs equipped with a voltage detector (V_{DET}). VR function of the R5510Hxxxx has features of high ripple rejection, low dropout voltage, high output voltage accuracy, and ultra-low supply current. Each of these ICs consists of a voltage reference unit, an error amplifier, resistors for setting output voltage, a current limit circuit, and a voltage detector. Each of the R5510HxxxL/M/N types includes also a chip enable circuit. The output of built-in voltage detector is Nch open drain type. The R5510HxxxD type has a pin for connecting external capacitor to set a certain reset delay time instead of chip enable control pin. VR Output Voltage of the R5510HxxxE/F/G types is adjustable with external resistors.

The regulator output voltage except R5510HxxxE/F/G types and the detector threshold voltage are fixed in the IC. Low supply current by the merit of CMOS process and built-in transistors with low ON-resistance make low dropout voltage. These regulators in the R5510Hxxxx Series are remarkable improvement on the current regulators in terms of ripple rejection, input transient response, and load transient response. Furthermore, the R5510HxxxA to G series can supervise input voltage by the built-in detector. R5510HxxxH/J/K types can supervise V_{SEN} pin voltage by the built-in detector.

Thus, the R5510Hxxxx series are suitable for power supply for CD-drives, DVD-drives, and so forth.

Since the package for these ICs is the SOT-89-5 package, high density mounting of the ICs on boards is possible.

FEATURES

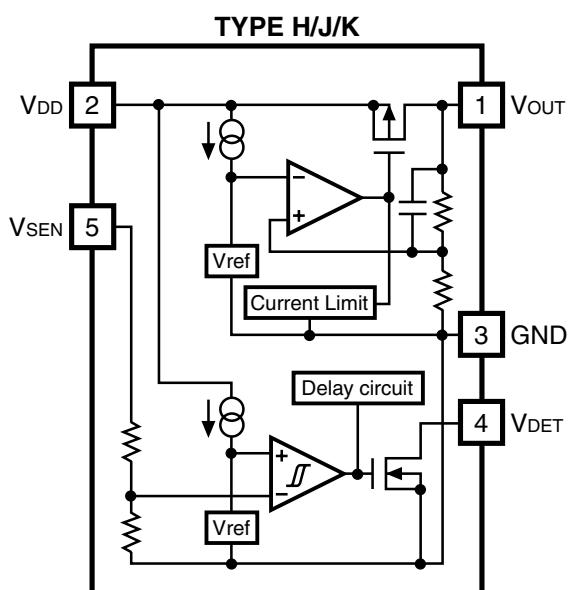

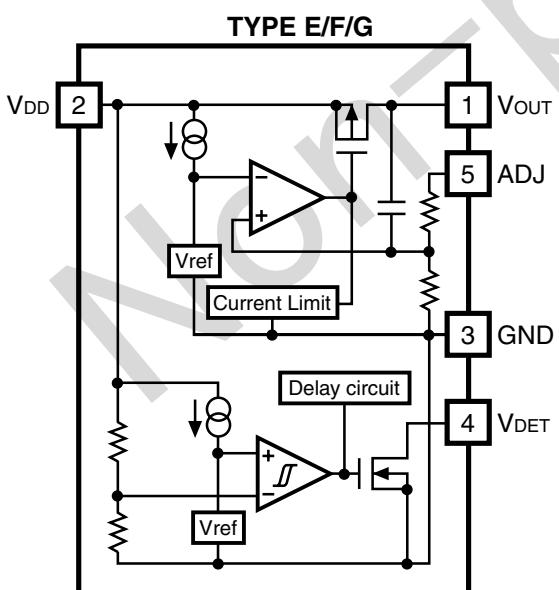

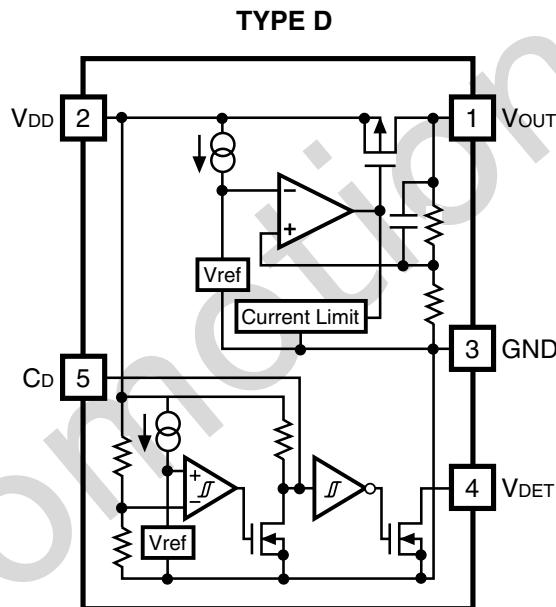

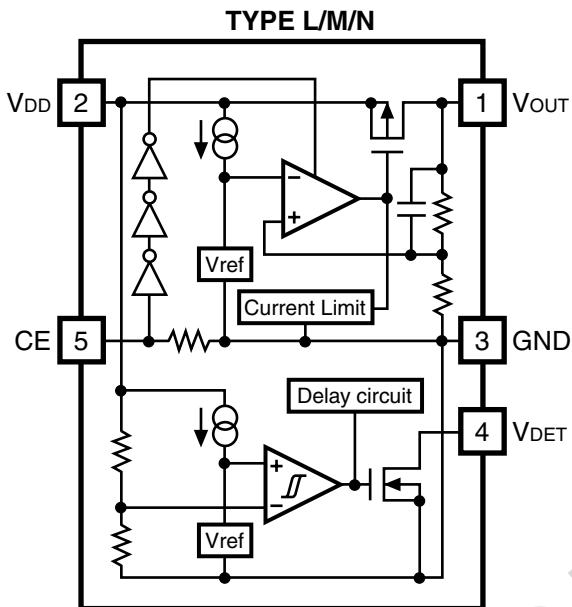

- Ultra-Low Supply Current Typ. $150\mu A$ (VR), Typ. $10\mu A$ (VD)
- Low Standby Current Typ. $0.1\mu A$ (VR) for L/M/N type
- High Ripple Rejection Typ. $60dB$ ($f=1kHz$) (VR)
- Output Current Min. $300mA$ ($V_{IN}=V_{OUT}+1V$)
- Output Voltage (VR) Stepwise setting with a step of $0.1V$ in the range of $2.5V$ to $5.0V$
- High Output Voltage Accuracy $\pm 2.0\%$ (VR) except E/F/G type,
 $\pm 2.0\%$ (Reference Voltage for adjustable VR) for E/F/G type
 $\pm 2.5\%$ (VD)* Output type of VD is Nch open drain.
- Low Dropout Voltage Typ. $0.2V$ ($I_{OUT}=100mA$) (VR)
- Small Package SOT-89-5
- Built-in Current Limit Circuits (VR)
- Low Temperature-drift Coefficient of Output Voltage... Typ. $\pm 100ppm/\text{ }^{\circ}\text{C}$
- Absolute Maximum Voltage 9V
- Built-in Reset Delay Circuits L/E/H (no delay time), M/F/J (delay time; 10ms), N/G/K (delay time; 50ms)
or Used with External Capacitor for Setting Reset Delay time..... D type

- Monitoring V_{DD} voltage Except H/J/K type
or monitoring sense pin (V_{SEN}) voltage..... H/J/K type

APPLICATIONS

- Power source for CD-drives and DVD-drives.

BLOCK DIAGRAMS

SELECTION GUIDE

The output voltage, the usage of pin No.5 (as a kind of types in the R5510Hxxxx series), the taping type can be selected at the user's request. The selection can be made by designating the part number as follows;

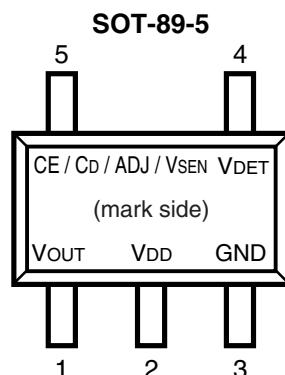

R5510Hxxxx-xx → Part Number

↑↑↑

a b c

Code	Contents
a	Serial Number for Voltage Setting
b	Designation of option; L: Built-in Chip Enable Circuit (V_{DET} output delay time is typically 0.5ms.) M: Built-in Chip Enable Circuit (V_{DET} output delay time is set typically at 10ms.) N: Built-in Chip Enable Circuit (V_{DET} output delay time is set typically at 50ms.) D: Used with External Capacitor for setting output delay E: Output Voltage Adjustable Regulator (V_{DET} output delay time is typically 0.5ms.) F: Output Voltage Adjustable Regulator (V_{DET} output delay time is set typically at 10ms.) G: Output Voltage Adjustable Regulator (V_{DET} output delay time is set typically at 50ms.) H: Voltage Detector with Individual Sense pin (V_{DET} output delay time is typically 0.5ms.) J: Voltage Detector with Individual Sense pin (V_{DET} output delay time is set typically at 10ms.) K: Voltage Detector with Individual Sense Pin (V_{DET} output delay time is set typically at 50ms.)
c	Designation of Taping Type; T1 or T2 (Refer to Taping Specifications)

PIN CONFIGURATION

PIN DESCRIPTION

Pin No.	Symbol	Description
1	V _{OUT}	Voltage Regulator Output Pin
2	V _{DD}	Input and Sense Pin of Voltage Detector
3	GND	Ground Pin
4	V _{DET}	Voltage Detector Output Pin (When Voltage detector detects the lowering voltage than setting threshold level, the output voltage level is "L". While V _{DD} Input level at reset detection or before crossing threshold level from higher voltage than it, the output voltage level is "H".)
5	CE	(L/M/N type) Chip Enable Pin
	CD	(D type) Pin for External Capacitor for Setting Output Delay of Voltage Detector
	ADJ	(E/F/G type) Adjustable Regulator feedback Input Pin (Connect to resistor voltage divider.)
	V _{SEN}	(H/J/K type) Sense Pin for Voltage Detector

ABSOLUTE MAXIMUM RATINGS

Symbol	Item	Rating	Unit
V _{IN}	Input Voltage	9.0	V
V _{CE}	Input Voltage (CE Input Pin)*Note	-0.3 ~ V _{IN} +0.3	V
V _{SEN}	Input Voltage (V _{SEN} Input Pin)	-0.3 ~ V _{IN} +0.3	V
V _{DET}	Output Voltage (V _{DET} Output Pin)	-0.3 ~ 9.0	V
V _{OUT}	Output Voltage	-0.3 ~ V _{IN} +0.3	V
I _{OUT}	Output Current	450	mA
P _D	Power Dissipation	500	mW
T _{opt}	Operating Temperature Range	-40 ~ 85	°C
T _{stg}	Storage Temperature Range	-55 ~ 125	°C

*Note: This item is for R5510xxxL/M/N Version.

*Reference Graph

- ## (2) Notes on Output Voltage Settings for E/F/G type

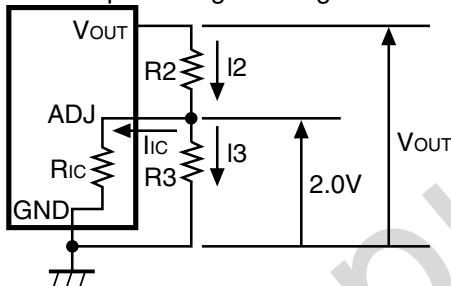

Figure 1. Adjustable Regulator(E/F/G type)

The Output Voltage of Regulator in R5510HxxxE/F/G may be adjustable for any output voltage between its 2V reference and its V_{DD} setting level. An external pair of resistors is required, as shown in Figure 1.

The complete equation for the output voltage is described step by step as follows;

thus,

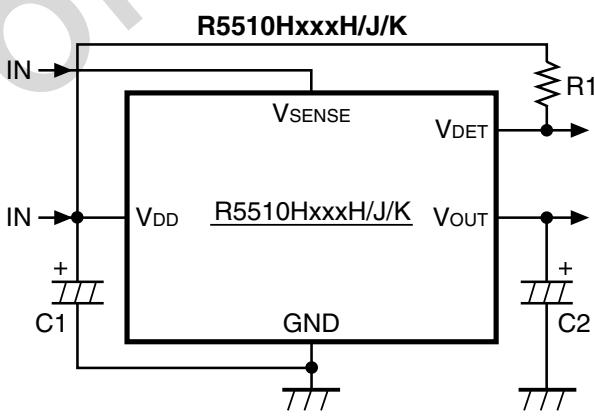

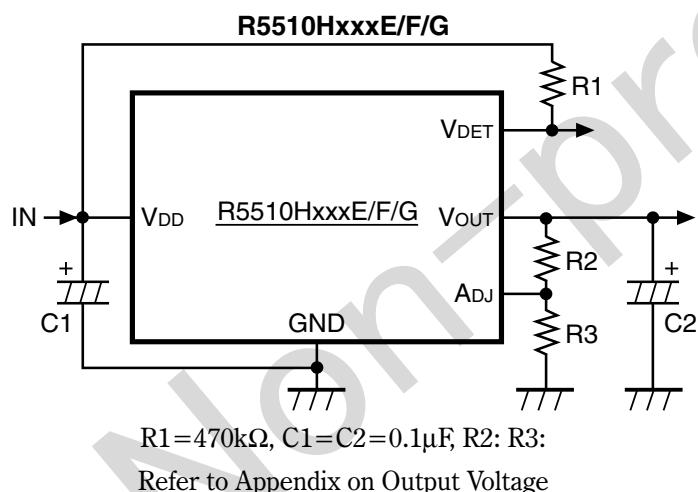

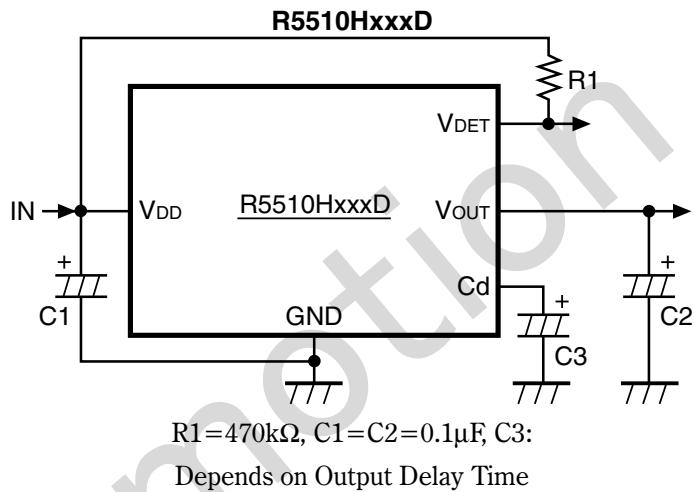

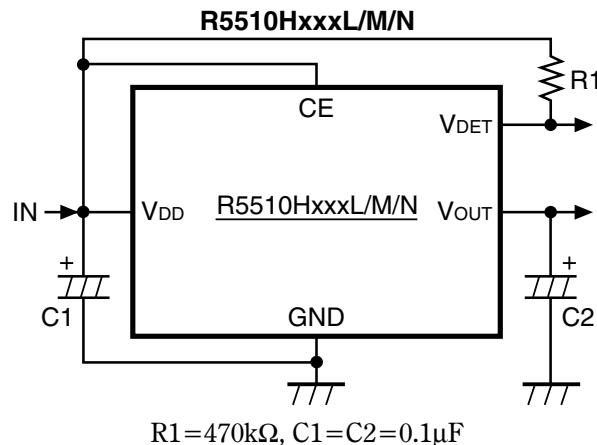

therefore,

then put Equation (3) into Equation (4), then

$$\begin{aligned} V_{OUT} &= 2.0 + R_2 \times (I_{IC} + 2.0/R_3) \\ &= 2.0 \times (1 + R_2/R_3) + R_2 \times I_{IC} \end{aligned} \quad (5)$$

where 2nd term, or $R_2 \times I_{IC}$ will produce an error in V_{OUT} .

TYPICAL APPLICATION

1. The products and the product specifications described in this document are subject to change or discontinuation of production without notice for reasons such as improvement. Therefore, before deciding to use the products, please refer to Ricoh sales representatives for the latest information thereon.
2. The materials in this document may not be copied or otherwise reproduced in whole or in part without prior written consent of Ricoh.
3. Please be sure to take any necessary formalities under relevant laws or regulations before exporting or otherwise taking out of your country the products or the technical information described herein.
4. The technical information described in this document shows typical characteristics of and example application circuits for the products. The release of such information is not to be construed as a warranty of or a grant of license under Ricoh's or any third party's intellectual property rights or any other rights.
5. The products listed in this document are intended and designed for use as general electronic components in standard applications (office equipment, telecommunication equipment, measuring instruments, consumer electronic products, amusement equipment etc.). Those customers intending to use a product in an application requiring extreme quality and reliability, for example, in a highly specific application where the failure or misoperation of the product could result in human injury or death (aircraft, spacevehicle, nuclear reactor control system, traffic control system, automotive and transportation equipment, combustion equipment, safety devices, life support system etc.) should first contact us.
6. We are making our continuous effort to improve the quality and reliability of our products, but semiconductor products are likely to fail with certain probability. In order to prevent any injury to persons or damages to property resulting from such failure, customers should be careful enough to incorporate safety measures in their design, such as redundancy feature, firecontainment feature and fail-safe feature. We do not assume any liability or responsibility for any loss or damage arising from misuse or inappropriate use of the products.
7. Anti-radiation design is not implemented in the products described in this document.
8. Please contact Ricoh sales representatives should you have any questions or comments concerning the products or the technical information.

RICOH COMPANY, LTD. Electronic Devices Company

■Ricoh presented with the Japan Management Quality Award for 1999.
Ricoh continually strives to promote customer satisfaction, and shares the achievements of its management quality improvement program with people and society.

■Ricoh awarded ISO 14001 certification.
The Ricoh Group was awarded ISO 14001 certification, which is an international standard for environmental management systems, at both its domestic and overseas production facilities. Our current aim is to obtain ISO 14001 certification for all of our business offices.
